

RELM BK
RADIO

Bendix King, long known as the 'wildland fire' radio, has long signified premier, high-specification public safety radios. Their rugged durability and rock solid reliability have stood the test of time for over 60 years. Features such as keypad programming to get you deployed quickly, cloning capabilities, APCO P25 compliancy and much more has made these radios a household name in the fire community. 49er Communications is the largest nationwide dealer for BK Radio with over half a million dollar inventory available to you immediately. Our customers consist of federal entities such as the USFS, BLM, BIA, NPS. We serve hundreds of city and county entities across the USA as well as multiple state entities like California and Texas Department of Forestry, Department of Corrections and dozens of Tribal end users.

Public Safety Solutions

Hytera

Hytera offers top quality radio products at highly competitive prices, focused on radios for Business & Industry you'll find much more bang for the buck when matched against competitive products from Kenwood, iCOM and Motorola. All radios come with a bumper to bumper 2 year warranty. Our best seller is the 610 radio, which comes in either VHF or UHF and has an IP66 rating which means when your radio is dirty, you put it under the faucet and wash it off. The 610 is great for all sorts of applications from manufacturing to golf courses to volunteer fire departments, and at under \$300 a radio it's a great value too. Radios from Hytera start as low as \$135 and up.

49er Communications is a full servicing two way radio dealer. We offer customer training on radio and system purchases at our office here in Northern California or at your facility anywhere throughout California, Nevada and Arizona.

Installs! We offer professional mobile radio, repeater, base station and system installation services. 49er Communications is your comprehensive public safety radio solution.

We can help design, procure and install your new P25 APCO compliant trunking or conventional system. We'll explore the options together to find the perfect fit with today's leading experts.

HARRIS
Authorized Dealer

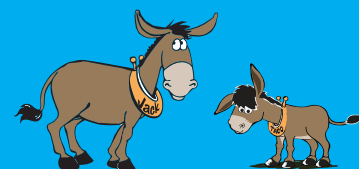

Interoperability! From routine calls to emergency response, Public Safety personnel rely on their communications systems every day. They need their equipment to be rugged and reliable. They need coverage throughout their jurisdictions whether rural, suburban or urban; they need the functionality in their communication systems to help them protect the lives of those they serve in their communities. Harris brand products fit this industry like a glove with options for complete trunking system design, to public safety quality handhelds and mobiles, to the UNITY multi-agency multi-band radio that handles VHF, UHF, 700/800 MHz all in one unit! Quality that won't quit.

STI-CO

STI-CO® designed a series of innovative antennas specifically for police, fire, utility, and emergency vehicles, tow trucks, taxis, airport shuttles, etc. The public safety sector needs an unbreakable antenna that will reduce replacement costs and save critical down time. They responded with the amazing Flexi-Whip antenna series that easily bends but will not break – guaranteed! In addition, they have a line of gain antennas for 700 or 800 MHz and/or GPS, with the same high quality and craftsmanship you rightly expect from STI-CO®.

Midland Radio Corporation is a world leader in wireless two-way and weather/hazard alert radios. Look no further for you APCO P25 base/repeater needs. Midland offers superior, ease of operation equipment, built to meet your specific needs at a price you can afford.
